

- 4** A student chooses to study for a degree in engineering at university rather than take a job working as an apprentice engineer. The apprenticeship lasts five years and involves training while working.

What will decrease the opportunity cost of this choice?

- A** a decrease in the wages paid to apprentice engineers
- B** a decrease in the number of students studying engineering degrees
- C** a decrease in the number of top grade engineering degrees awarded
- D** a decrease in the length of an engineering apprenticeship to four years
