

30 Which criticism of foreign direct investment (FDI) is **least** valid?

- A** It encourages competition, reduces prices and forces the less efficient domestic firms to leave the market.
- B** It brings workers from its own country and provides only low paying jobs to low skilled local workers.
- C** It is usually withdrawn quickly in case of a global crisis, making developing countries more vulnerable to global shocks.
- D** Its actions often result in environmental degradation, and over exploitation of natural resources.
