

HUMAN GEOGRAPHY

SECTION II

Time—1 hour and 15 minutes

3 Questions

Directions: You have 1 hour and 15 minutes to answer all three of the following questions. It is recommended that you spend approximately one-third of your time (25 minutes) on each question. It is suggested that you take up to 5 minutes of this time to plan and outline each answer. You may plan your answers in this orange booklet, but no credit will be given for anything written in this booklet. **You will only earn credit for what you write in the separate Free Response booklet.**

Question 1

1. The rate of natural increase (RNI), also known as the natural increase rate, helps geographers assess annual population growth or decline.
 - A. Define the concept of RNI.
 - B. Describe how a country may have a negative RNI.
 - C. Compare ONE difference between RNI and the total fertility rate as indicators of population change.
 - D. Explain ONE reason why RNI in urban areas may vary significantly from RNI in rural areas in the same country.
 - E. Explain why there are often differences in doubling times between less developed countries and more developed countries.
 - F. Explain ONE reason ethnonationalism might lead a government to promote pronatalist policies.
 - G. Explain the degree to which a unitary government may be more effective than a federal government in enforcing antinatalist policies.

Begin your response to this question at the top of a new page in the separate Free Response booklet and fill in the appropriate circle at the top of each page to indicate the question number.
