9 A school stores all the students' attendance data in a file called `Attendance.txt`

Write an algorithm in pseudocode to read a line of text from the file and store this line in the variable `StudentAttendance`

.....

.....

.....

.....

.....

..... [4]

10 The variables `Seconds` and `Minutes` are used in a program. `Seconds` holds the number of seconds as a whole number and `Minutes` holds the number of minutes as a whole number.

(a) Write pseudocode statements to declare the variables `Seconds` and `Minutes`

.....

.....

..... [1]

(b) The procedure `Time(TotalSeconds)` takes the number of seconds as a parameter. The procedure converts the value held in the parameter into minutes and seconds and outputs the result.

Write this procedure in pseudocode.
