

- 21** Subsistence farming is the practice of growing crops and raising livestock sufficient only for one's own use without any surplus for trade.

Why is it difficult for a government to measure economic growth in an economy based on subsistence farming?

- A** Farmers' families consume most of their own produce.
- B** Farmers have low rates of saving.
- C** The size of harvest is dependent on the weather.
- D** The surplus produce is sold to the government.
