

- 29** In the diagram, curves D_1 and S_1 relate to the demand and supply of the US dollar (\$) against the Chinese yuan.

What is most likely to cause the demand curve for US dollars to shift from D_1 to D_2 ?

- A** a fall in Chinese interest rates
- B** a fall in US interest rates
- C** a faster growth rate in the US economy
- D** a reduction in the US government budget deficit
